Claim Rejections - 35 USC § 112

The modifications to the claims were received on 12/26/2008. These modifications are accepted by the Examiner.

In view of the amendment filed on 12/26/2008, the Examiner withdraws claim rejections under 35 USC § 112 second paragraph to claims 1-2, 11, 13-14 and 20-21 of the previous Office action.

Claim Rejections - 35 USC § 101

The modifications to the claims were received on 12/26/2008. These modifications are accepted by the Examiner.

In view of the amendment filed on 12/26/2008 and the present Examiner Amendment, the Examiner withdraws claim rejections under 35 USC § 112 second paragraph to claims 15-19 of the previous Office action.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided

by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Joseph J. Opalach on 1/12/2009.

The application has been amended as follows:

a) In claim 15 line 7 the recitation "demodulating" is changed to "demodulating by a demodulator"

b) In claim 18 line 7 the recitation "demodulating" is changed to "demodulating by a demodulator"

Allowable Subject Matter

Claims 1, 2, 4-11, 15 and 17-19 (renumbered 1-14) are allowed.

The following is an examiner's statement of reasons for allowance: claims 1, 2, 4-11, 15 and 17-19 (renumbered 1-14) are allowed because a comprehensive search of prior art failed to teach, either alone or in combination, a receiver comprising a down converter for providing a received signal, and a demodulator having at least two demodulation modes for demodulating the received signal, wherein one demodulation mode is hierarchical demodulation and another demodulation mode is layered demodulation, and wherein the demodulator comprises an upper layer demodulator for processing the received signal to provide a demodulated upper layer signal, an upper layer decoder for decoding the demodulated upper layer signal to provide a decoded upper layer signal, an upper layer remodulator/reencoder responsive to the decoded upper layer signal for providing a reconstructed modulated upper layer signal, a

combiner for combining the received signal with the reconstructed modulated upper layer signal such that an upper layer signal component of the received signal is substantially reduced therefrom to provide a received lower layer signal, a lower layer demodulator for processing the received lower layer signal to provide a demodulated lower layer signal, a selector for providing a lower layer signal derived from either the demodulated lower layer signal or the demodulated upper layer signal, and a lower layer decoder for decoding the lower layer signal to provide a decoded lower layer signal, as the applicant has claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

a) Chen (US 20040184521 A1) discloses digital signals equalizing method for digital communication system, involves generating equalizer parameters from training sequence containing adjacent symbols of input data.

b) Chen (US 20020181604 A1) discloses layered modulation for digital signals.
